

Low Rise Platform Lifts

A low rise platform lift is a space saving and cost effective way to provide access for everyone to your home or workplace.

Lift Me supplies and installs the Pandect range of low rise platform lifts. Pandect lifts are manufactured to meet the Australian Standards for low rise lifts and the Disability Discrimination Act.

All Pandect lifts are suitable for both indoor and outdoor use, and can be installed in new building projects or retrofitted into existing premises.

If you are having trouble getting up or down stairs, or need to provide easy access for everyone to your home or workplace, contact Lift Me to find out how we can assist you with a lift to suit your individual needs.

Lift Me
Stairlifts & Low Rise Platform Lifts

Stay in the home you love with a stairlift from Lift Me

Climbing stairs can be awkward and physically demanding for some people. A stairlift is a simple and affordable way to provide easy access to your entire home.

Straight Staircases

Straight stairlifts are used where the staircase has no bends, curves, landings or changes in direction. For straight staircases, Lift Me supply and install Meditek stairlifts.

Meditek stairlifts are available for both indoor and outdoor use. Outdoor lifts are specifically manufactured to withstand the harshest weather conditions, by weatherproofing the motor, switches and electronics.

All Meditek stairlifts are manufactured using only quality materials and craftsmanship, to ensure years of trouble free use.

Curved Staircases

Stairs with landings or changes of direction require a curved stairlift. For curved staircases, Lift Me supply and install Platinum Curve stairlifts.

The Platinum Curve has been designed to fit snugly and unobtrusively to your staircase. As every staircase is different, the Platinum Curve stairlift is custom built for each project.

Platinum stairlifts have an international reputation in the design and manufacture of high quality lifts.

Features

Designed for safety, including a swivel seat, seat belt, pressure sensitive safety edges and key switch.

Simple to use by a finger control lever on the armrest and wireless remote controls.

Fold up seat, arm rests and foot rests makes the stairs available for others when the stairlift is not being used.

Quick Installation - the rails are fixed to the stair treads, no wall fixings or other modifications are required.

The lift is powered by a standard 240V power point to onboard rechargeable batteries. The lift will always be available for use, even in the event of a mains power failure.

120Kg or 160Kg models available.

Other options are available to meet you individual needs.
